Red & Grey

Use the words below to fill in the blanks and complete the sentences

Bark	Endangered	Competition
Conservation	Invasive	Species
Habitat	Two	Woodlands
Native	Kittens	Squirrel pox

Red and grey squirrels are different \_\_\_\_\_ of tree squirrel. Red squirrels are a \_\_\_\_\_ species, and grey squirrels are a non-native, \_\_\_\_\_ species in the UK.

Red squirrels can live in mixed \_\_\_\_\_. But when red and grey squirrels share a \_\_\_\_\_, there is \_\_\_\_\_ for food and space.

Grey squirrels spread a virus called \_\_\_\_\_. This does not affect greys, but is harmful to red squirrels.

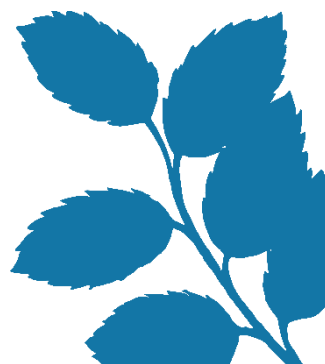

Baby squirrels are called \_\_\_\_\_, red squirrels normally have \_\_\_\_\_ litters of kittens a year and have three or four babies each time.

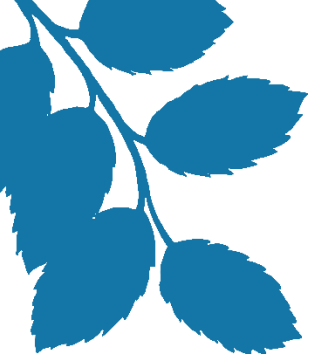

Both red and grey squirrels strip the \_\_\_\_\_ off trees, but when grey squirrels do this, the trees are badly damaged and often die.

Red squirrels are \_\_\_\_\_ in Great Britain, so they need \_\_\_\_\_ projects like Reclaiming Reds to help them survive.
